It will auto shutdown after 5 minutes under no operation.

Monitor info

After reload magazine, the system will consider it to be full ammo status, total 25 bullets. Therefore, not full ammo magazine is reloaded, may be displayed quantity not match the actual quantity.

If the core temperature is greater than 70 °C , the mode will switch to semi-auto to avoid overheating. Usually, 200 rounds or more may cause overheating.

Problems in use

As long as you don't use obviously deformed bullets, jammed will almost never happen.

If the magazine cannot be ejected, please re-power on and shoot again, generally, the problem can be solved.
